Licensing Conditions

Mibble is commercially available either with a standard license or with custom licensing. The software packages do not differ in terms of features or content, but only with respect to contractual obligations and pricing. All commercial editions of Mibble include the following:

- **Full Source Code Availability** — The full source code for the Mibble library is available and permission is granted to make proprietary changes.
- **Free Redistribution** — Software based on, using or containing code from Mibble may be redistributed in either binary or source code form. This permission does not extend to third parties, however.
- **No Royalties, No Expiration** — The license is perpetual, contains no further royalty payments, and does not restrict usage to any particular product, purpose or developer.

Please note that any software bundled with Mibble is covered by their own respective license.

Standard License

The standard license covers a single commercial version of Mibble and is detailed in the standard license agreement (see separate PDF on the web site). Updates to newer versions can be purchased at a reduced price.

- **Single Version** — 1300 EUR (i.e. the initial purchase)
- **Additional Versions** — 500 EUR (i.e. updates to a new version)

Note that the standard license prices are only applicable when no additional contracts or legal agreements are required. In all other cases, a custom license agreement is required.

Custom Licenses

If the standard license agreement is not suitable or is too restrictive, customized license agreements can be arranged. A custom license payment is also required if additional legal agreements are made, whether in the form of signed printouts, non-disclosure agreements, software supplier contracts or otherwise.

- **Single Version** — 2200 EUR (required)
- **Legal Review** — 800 EUR (optional, per contract). Note that each additional legal agreement must be separately reviewed by a legal counsel; whether they are in the form of non-disclosure agreements, software supplier contracts, license text modifications, etc.
- **Shipping & Handling** — 500 EUR (optional). Provides signed hardcopies or scanned PDFs with signatures on the license documents.
- **Sublicensing** — 2400 EUR (optional). Adds a standard clause to the license to allow third party distribution of a product containing Mibble.
- **Other Provisions** — Modified license provisions may incur costs not outlined here. Please send a detailed licensing request to receive a price quote.
